# X-40P SECTIONAL OVERHEAD DOORS

40 mm insulated steel panels protected by high-quality sealing

A variety of window options invite natural light and visibility

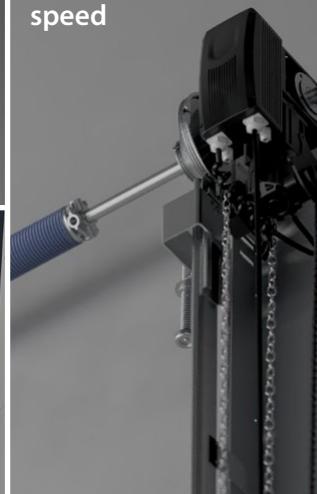

Since 1987, Dynaco has been driven by one mission: delivering innovative door solutions that combine performance, safety, and reliability. Starting with the first flexible, self-repairing high-speed door, inspired by a simple pool cover, Dynaco set a new standard in the industry. Later, our breakthrough Push-Pull technology redefined what high-speed doors could achieve, earning us the reputation for creating "the most copied door in the world."

Today, Dynaco continues to lead with the most comprehensive product range in the market. Alongside our high-speed roll-up doors, we now offer Sectional Overhead Doors, designed to provide robust insulation, durability, and smooth operation for industrial and commercial environments. This integration ensures that customers can find the perfect solution for every application, from cleanrooms to warehouses, all backed by Dynaco's commitment to quality and innovation.

With a global network of professional partners across five continents, Dynaco remains Always Ahead, delivering doors that meet the highest standards and keep end-users at the center of everything we do.

**Not every industrial application calls for complexity. Sometimes the best solution is the one that simply works. That's exactly what the X-40P by Dynaco delivers: a reliable entrance door in our overhead sectional range, built to provide businesses that value clarity and core performance with essential functionality. Designed for flexibility, it fits seamlessly into a wide variety of settings — from manufacturing and warehousing to distribution and logistics.**

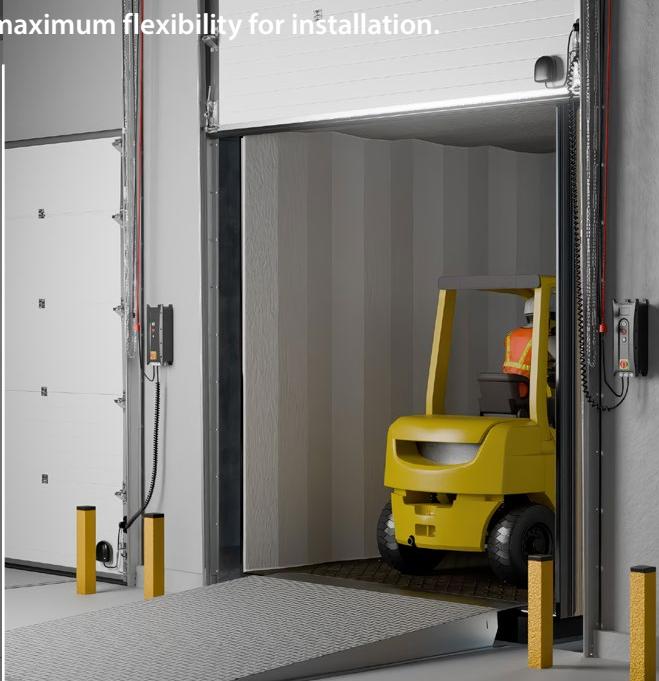

Motorized system with smooth 0.25 m/s opening speed

Convenient control

Four lift types, standard, low, high and vertical, give maximum flexibility for installation.

By combining everyday dependability with strong energy efficiency and long-term durability, the X-40P helps create safer, more cost-effective working environments wherever it's installed.

Built for essential functionality, the X-40P brings together a range of features for insulation, durability and reliable day-to-day performance in one straightforward solution.

#### Keep energy in and costs down

- 40mm insulated steel panels designed without thermal bridges for optimal efficiency
- High-quality sealing at top, bottom and sides helps reduce energy loss

#### Match your door to your building

- A selection of five standard RAL color choices
- Optional factory painting in almost any RAL or NCS color
- Invite light and visibility with a range of window options

#### Control access simply and safely

- Manual, semi-automatic or fully automated operation available

- Motorized system with smooth 0.25 m/s opening speed
- Convenient control and access options to suit site needs
- Built-in safety features and secure locking for greater peace of mind

#### Keep operations running smoothly

- Class 3 performance in wind load and water resistance, as well as air permeability
- Reliable thermal performance and acoustic insulation
- Fully compliant with European standards for safety and reliability

#### Fit your door to any layout

- Four lift types: standard, low, high or vertical for maximum flexibility
- Flexible installation makes it suitable for a wide range of facilities

**This is an overhead sectional door that gives you everything you need – and nothing you don't.**

## Why this is the right door for your business?

### Unique glass technology

Thanks to the 2,5 mm acrylic we create a better appearance of the facade without any reflection.

### Energy saving

Thanks to the outstanding U value of the doors and the performances of the electrical operator, the Dynaco Sectional doors becomes the best way to maximize temperature control inside the buildings.

### Electrical operations

The Dynaco X-40P door is equipped with the Servox operator and control unit. Compatible with sensors like radar, magnetic loops and photocells. Also operable via push buttons and handheld remotes. Features include soft start/stop, LCD display and brushless technology. Operating speed up to 0,2 m/s, IP54 rating and 60 cycles per hour.

### Made to measure

This door is fully customizable with a large aesthetic choice.

### Certified performance

Performance of all Dynaco doors has been tested and certified by a third-party notified body.

### Rigid and secure

Dynaco sectional overhead doors are ideal to protect your building when closed.

### Wind resistant

Wider door panels and panels with windows are reinforced with metal profiles that act as trusses.

## Why Dynaco?

### Conform to EN norms

All Dynaco doors are completely conform to EN13241-1.

### Wind resistant

Wider door panels and panels with windows are reinforced with metal profiles that act as trusses.

Dynaco offers a wide range of products for several industrial applications.
